s.no	prompt				purpose
1	Create a monthly budget for a college student with an income of ₹500				Budget Creation
2	Calculate total expenses and remaining balance from the given data				Calculation
3	Suggest three saving scenarios based on a balance of ₹1700				Saving Planning

s.no	Item Checked	Expected Result	Actual result	Status
1	Total Income	5000	5000	Correct
2	Total Expenses	3300	3300	Correct
3	Balance	1700	1700	Correct

s.no	Before AI	After AI	Improvement	
1	Manual Calculati	AI assistant Calc	Faster Calculation	
2	Different to plan s	Three Saving sce	Better Saving scenarios	

Project	AI Budget and Expenses Planner		
Monthly Income	5000		
Total Expenses	3300		
Remaining Bala	1700		
Saving Option	10% 20% 30%		
Verification	All Calculation Checked		

Total Income	Total Expenses	Balance	Calculation Check				
5000	3300	1700	Aim: To verify the accuracy of income, expenses, and balance calculations in the budget sheet. Calculation: Total Income = Sum of all income entries Total Expenses = Sum of all expense entries Balance = Total Income - Total Expenses Verification: The calculations are checked manually to ensure accuracy. Result: The budget calculations were verified for correctness.				

Automation /WorkFlow					

Automation and Workflow

Aim
To automate budget calculations and simplify monthly expense tracking using Google Sheets.

Workflow
1. Enter student income details.
2. Enter monthly expenses.
3. Categorize income and expenses.
4. Calculate total income and expenses using formulas.
5. Calculate the remaining balance automatically.
6. Display the budget summary and savings scenarios.

Automation
Google Sheets formulas automatically update totals and the remaining balance when input values change.

Result
The budget tracking workflow was documented successfully.

saving scenario	Monthly Income	Monthly Expense	Monthly Balance	Saving Amount
Scenario 1 (10%	₹5,000	3300	1700	170
Scenario 2 (20%	₹5,000	3300	1700	340
Scenario 3 (30%	₹5,000	3300	1700	510
